

Contents

Foreword — VII

List of Abbreviations — XVII

Part One

A. Introduction — 3

B. A Thought on Optimal Regulation — 6

1. The Epistemological Gap — 6
2. Alternative Metaphors — 9

Part Two

C. What is Disruptive Change? — 15

1. Toward a Model of Disruptive Change — 15
2. Construct Clarity and Construct Limitations — 17
3. A Model of Disruptive Change — 19
 - a. The Model Setting — 19
 - aa. Organization-Environment Relationship — 19
 - bb. Tasks and Issues — 20
 - b. Phase One: The Emergence of Change — 21
 - aa. Issue Maturation - Arena for Issues — 23
 - bb. The Public Arena — 24
 - cc. Relevant Discontinuities — 25
 - (1) Climate Change — 26
 - (2) Advancements in Technology — 27
 - (3) Regulation — 29
 - (4) Societal Transformation — 30
 - (5) The COVID-19 Pandemic — 31
- c. Phase Two: Endogenizing Uncertainty — 32
 - aa. Early Stage: The Organizational Arena — 33
 - (1) Business Model Analysis - An Integral Part of the Issue Formulation — 34

- (2) Premature Action? — 35
 - bb. Late Stage: Shocks, Physical Impacts and Diminution of Returns — 37
 - d. Phase Three: Disruption — 38
 - e. Miscellaneous Thoughts — 40
 - aa. The Velocity of Adaptation — 40
 - bb. Is Disruptive Change Predictable? — 41
 - cc. The Performance Indicators of Disruptive Change — 42
 - (1) Financial Reporting — 42
 - (2) Insights for Regulation — 43
 - dd. Mergers and the Market for Corporate Control — 44
- D. Disruptive Change and the Market Mechanism — 46**
 - 1. The Pricing Mechanism — 46
 - 2. Pricing Disruptive Change – The Market’s Quest for Equilibrium? — 48
 - 3. Complexity and Adaptation Hypotheses — 49
 - a. Transition Phases — 51
 - b. The Role of Information Costs — 53
 - c. Divergent Investment Horizons — 54
 - d. Speculative Bubbles and Fire Sales — 56
 - 4. Disruptive Change and Market Microstructure — 57
 - a. Disruptions and Market Liquidity — 57
 - b. Disruptions and Market Volatility — 60
 - 5. Financial Stability? — 62
 - 6. Summary — 63

Part Three

- E. Disruptive Change and Regulation — 67**
 - 1. On Informational Regulation and Merit Regulation — 67
 - a. Structural Fallacies of Informational Regulation — 68
 - b. The Asymmetry-centered Information Regime — 70
 - aa. Theoretical Background — 70
 - bb. Limitations — 71
 - c. A System-based Information Regime — 73
 - 2. A New Regulatory Program: System Governance — 74
 - 3. Outlook and Further Analysis — 76
 - 4. The Environment, Information and Uncertainty — 77
 - a. Risks — 78

- b. Information and the “Resolution” of Uncertainty — **79**
 - aa. Individual Decision Making under Certainty, Risk and Uncertainty — **80**
 - (1) Decision Making as Economizing — **81**
 - (2) Decisions, Information and Knowledge — **82**
 - (3) Multiperiod Decisions and Path Dependencies — **84**
 - (4) Decisions and Assumptions about the Future — **85**
 - (5) Heuristics and Uncertainty — **87**
 - bb. Uncertainty and Social Interaction — **88**
 - c. On the Threshold Between Risk and Uncertainty — **90**
5. Uncertainty and Risk-based Financial Regulation — **92**

F. A Process-oriented Approach to Informational Regulation — 95

- 1. The Functioning of the Financial Market — **95**
 - a. The Efficiency of the Capital Market — **96**
 - b. The Underlying Market View — **98**
 - aa. The Efficient Market Hypothesis — **98**
 - bb. Market Process Theory — **100**
 - cc. The Adaptive Market Hypothesis — **101**
 - c. Evolutionary Efficiency — **102**
 - aa. An Institutional Approach to Informational Regulation — **104**
 - bb. Limitations of the Market Efficiency Rationale — **105**
 - d. The Non-binary Character of Market Efficiency — **107**
- 2. A Lack of Positive Theory – System Exploration — **107**
 - a. Information as a Regulatory Object — **109**
 - aa. The Concept of Information — **109**
 - bb. A Difference That Makes a Difference? — **109**
 - b. Conclusion: Regulating Agents Instead — **112**
 - c. The Micro-Meso-Macro Paradigm — **112**
 - aa. Making Use of Complexity Theory in Financial Regulation — **114**
 - bb. Micro-Level: An Ecology of Plans and Expectations — **115**
 - (1) Environmental Uncertainty and Initial Distribution of Information — **116**
 - (2) A Matter of Asymmetric Information? — **117**
 - (3) The Heterogeneity of Agents — **118**
 - cc. Interaction on Micro-Level: Information Goods? — **119**
 - (1) Manifestations of the Market for Information — **120**
 - (2) Limitations to the Market Exchange of Information — **121**
 - i. The Informational Dilemma — **122**
 - ii. Self-correcting Mechanisms — **123**

- (3) Information Rules Instead of Information Goods — **125**
 - i. Actualization of Information — **125**
 - ii. The Genetic Algorithm Analogy — **126**
 - iii. The Learning Agent — **127**
 - iv. Self-similarity — **128**
 - (4) Information, Insurance and Hedging — **130**
 - (5) Herding: Localized Conformity — **131**
 - dd. Macro: A Fundamentally Efficient Market Price — **132**
 - (1) System Behavior — **133**
 - (2) Market Configurations and Transitions — **134**
 - (3) Source of Information or Information Surrogate? — **135**
 - (4) Prices and Adaptations — **136**
 - (5) Computational Models and Industry Endgames — **138**
 - ee. Meso-Level? — **140**
 - ff. Informational Externalities — **140**
 - gg. Conclusion: A New Market Ontology — **142**
- d. The Legal Framework that Governs the Market for Information — **142**
 - aa. The Dogmatics of European Disclosure Regulation — **142**
 - (1) Dogmatic Theory — **143**
 - (2) Economic Analysis and Decentralised Law – Obstacles for Legal Dogmatics? — **144**
 - (3) Teleological and Systematic Analysis? — **146**
 - bb. Economic Analysis of the Law — **148**
 - (1) Command and Control — **148**
 - (2) The Cheapest Cost Avoider – A Kaldor-Hicks Efficient Distribution — **149**
 - (3) Two Information Cycles? — **151**
 - (4) Decision-usefulness and Information — **153**
 - i. Optimization — **153**
 - ii. Accountability — **154**
 - (5) Information Attributes — **156**
 - i. Reliability and Relevance — **157**
 - ii. Understandability and Readability — **158**
 - iii. Materiality — **159**
- e. The Framework’s Ability to Cope with Uncertainty and Transitions — **160**
 - aa. Uncertainty and the Dogmatics of the EU Disclosure Regime — **161**

- bb. Rules on Information Production – Level-1 Acts — **162**
 - (1) Textual Interpretation — **162**
 - (2) Teleological and Systematic Interpretation — **164**
- cc. Management Report, Art. 4(2b) TD, Art. 19(1) AD — **165**
 - (1) Current Position and Likely Future Development, Art. 19(1) and Art. 19(2a) AD — **166**
 - (2) Principal Risks and Opportunities, Art. 19(1) AD — **168**
- dd. Non-financial Reporting — **169**
- ee. Sustainability Reporting — **171**
 - (1) EU Taxonomy Regulation — **172**
 - (2) The Proposed CSRD — **173**
 - (3) The Draft ESRS — **175**
 - i. Draft ESRS 1 & 2 – Cross-cutting Standards — **176**
 - ii. Draft ESRS E1 – Topical Standard Climate Change — **177**
- ff. Statement of Business Model, Art. 19a AD — **178**
- gg. Internal Control System, Art. 20(1c) AD — **180**
- hh. Substantive Disclosure Rules and Uncertainty – IFRS — **181**
 - (1) Income Statement — **182**
 - (2) Recognition of Assets and Impairments — **183**
 - (3) Stranded Assets — **185**
 - (4) Intangibles — **186**
 - (5) Fair Value and Informationalist Tendencies — **187**
 - (6) The Notes — **189**
 - (7) Segment Reporting — **191**
 - ii. Quarterly Financial Reports and Adaptation Processes — **191**
- jj. Voluntary Reports and Investor Relationship Management — **192**
 - (1) Nature and Relevance — **192**
 - (2) Impact and Criticism — **194**
 - (3) Conclusion — **195**
- kk. Forward-looking Information and the European Disclosure Framework — **195**
 - (1) The Role of Forward-looking Information — **195**
 - (2) A Legal Terminology? — **197**
 - (3) A European Standard for Forward-looking Information? — **198**
 - i. A Bespoke System? — **199**
 - ii. Safe Harbor Rules and Diametrically Opposing Interests — **200**
- f. Rules On Information Dissemination – Beyond Equal Access — **200**
 - aa. Ad-hoc Disclosures — **201**

- bb. Policy Goals — **202**
- cc. How Could Inside Information Occur in Adaptation Processes? — **203**
- dd. Relating Directly or Indirectly to an Issuer — **203**
- ee. Precise Information — **204**
- ff. Price Relevance — **205**
- gg. Unknown to the Wider Public — **206**
- hh. Right to Delay — **207**
- ii. Conclusions — **207**
- g. Voluntary, Selective Disclosures to Investors and Analysts — **207**
- h. Overall Coherence of the Annual Report — **209**
- 3. Investor Protection, Market Integrity and Information — **210**
 - a. Investors as Heterogeneous Agents — **212**
 - b. Market Trust and Market Integrity — **213**
 - c. Conclusion — **215**
- 4. Financial Stability and a System-based Information Regime — **215**
 - a. Towards An Operational Definition of Financial Stability — **216**
 - aa. Financial Stability, Intertemporal Allocation and Uncertainty — **218**
 - bb. On the Relationship Between Market Efficiency and Financial Stability — **221**
 - (1) The Positive Conflict — **221**
 - (2) A Normative Conflict? — **223**
 - b. Disruptions – A Systemic Risk? — **224**
 - c. Supervision of Industry Disruptions? — **226**
- 5. Sustainability — **227**
 - a. A Rationale for Capital Markets Regulation? — **229**
 - b. Environmental Discontinuities and the Tragedy of the Horizon — **230**
- 6. Summary — **232**

Part Four

G. Responding to Disruptive Change — **235**

- 1. The Regulatory Goal — **235**
- 2. Regulatory Design — **235**
 - a. Regulatory Fatalism — **235**
 - b. Environmental Uncertainty and Mandatory Disclosures — **235**
 - c. Adaptive Informational Regulation — **236**
 - d. Relativity — **238**

3. Toward a European Framework for Scenario Analyses — 239
 - a. The Production of Information? — 239
 - b. The Itemization of Threats — 240
 - c. Identification of Business Model Threats — 241
 - aa. A Voluntary Reporting Program — 241
 - bb. A Principles-based Approach — 243
 - cc. The Regulatees — 245
4. Scenario Analyses in Periodic Disclosures — 245
 - a. Point of Reference: Business Model Reporting — 246
 - aa. “Objectifying” Business Model Reporting — 247
 - bb. Business Model Resilience — 248
 - cc. Adaptive Capabilities — 250
 - b. The Uncertainty Report — 250
 - c. The Transitions Report — 252
 - aa. On “Long- and Short-term” Information — 253
 - bb. Reporting on Organizational Inertia — 254
5. Ensuring the Reliability of the Report — 254
 - a. A Clear Separation — 255
 - b. Plausibility — 255
 - c. Faithfulness and Completeness — 256
 - d. Comparability — 257
 - e. Enforcement and Supervision — 258
 - f. Third Party Assurances — 260
6. The Relationship with Existing Reporting Formats — 261
7. Decision-useful – In Which Environment? — 261

H. Further Research and Related Issues — 264

1. Audit — 264
2. Corporate Governance — 265

I. Main Theses — 267

The Phenomenology — 267

Rationales For Regulation — 268

1. The Asymmetry-centred Disclosure Regime — 268
2. Risk and Uncertainty — 268
3. Market Efficiency — 269
4. Financial Stability — 270
5. Investor Protection and Sustainability — 270
